PROJECTS

Student Management (CRUD) — *Built using Python and SQL*

Implemented features for adding, viewing, updating, and deleting student data, including name, roll number, grade, and contact information.

House Price Prediction Web Application — *Developed the entire project in PyCharm IDE*

Developed a full-stack web application in PyCharm IDE to predict house prices using machine learning algorithms (e.g., Linear Regression, Random Forest).

Smart Dairy System — *Built Using Flutter, Dart, Supabase PostgreSQL*

Built a milk delivery app with role-based login (Admin, Customer, Delivery). Enabled real-time data, user-specific dashboards, and PostgreSQL backend.
